

Instruction of installation Merriam-Webster for BlackBerry

Application **Merriam-Webster for BlackBerry** includes only the dictionary engine and requires the dictionary databases to be installed, which then will be used for translation without any additional internet connection.

Application installation

1. Unzip the package that you downloaded. After unzipping the package you will get the folder in which you will find two files:

- *.alx

- *.cod

2. Connect your BlackBerry to your PC by the special phone's cable instrumentality (via Infrared or Bluetooth wireless technology).

3. Launch the BlackBerry Desktop Manager on your desktop computer.

4. Make sure the device is connected to the computer and turned on (the status "Connected" is displayed in the appeared window).

5. In the desktop manager window launch the Application Loader.

6. Press Next.

7. In the appeared window press the Add button and choose the *.alx file.

8. Press Next then press Finish.

9. Find **Merriam-Webster** icon on your BlackBerry and launch application.

Dictionary databases installation

After you install and launch the dictionary engine the application will offer you two possible ways for downloading and installing the dictionary databases:

- using a desktop computer (without any mobile Internet connections)

- directly on your device (**OTA-Over The Air**)

If you want to use your **desktop computer** to install the dictionary databases, please follow the instruction:

1. Visit the web-site on your desktop computer using the links that will be shown to you device after the launch of the application.

2. Download the dictionary databases to your computer.

3. Connect your BlackBerry phone to the desktop computer and copy the downloaded dictionary databases to the Device Memory (or Media Card).

If you choose to install the databases **directly on your device**, the required files will be automatically downloaded to your BlackBerry phone from our server using any type of internet connection available. You should just select the location for saving the dictionary databases (Internal memory, Device Memory or Media Card). Please, before downloading check that your phone internet connection settings are correct.

You can abort downloading any time by pressing **Stop** button. Later you will be able to resume the download process.

Supported devices

This version supports the devices with BlackBerry OS 4.2.1 and higher.
