About SlovoEd

SlovoEd is a well-known set of products developed by **Paragon Software Group** for popular mobile operating systems such as Symbian OS, Windows Mobile/Pocket PC, Windows CE Smartphone and Palm OS.

The advantages of SlovoEd dictionaries are intuitive user interface, large and rich dictionary databases and reasonable memory consumption at the same time, high translation speed and possibility to use several dictionary databases at once.

You can also install additional sound modules available for English, Spanish, German, Italian and French. With these modules you can listen to the pronunciation of words sounded by native speakers. It is essential feature for language learners. Most Deluxe editions of SlovoEd dictionaries include sound modules by default. Just like dictionaries, the sound modules are available in Compact, Classic and Deluxe editions depending on number of the sounded words.

Just like other products developed by Paragon Software Group, SlovoEd is distinguished by the high reliability and standard compliance. SlovoEd dictionaries have been successfully tested for Symbian Signed program. Please, visit www.symbiansigned.com for more information

Read, learn, work and travel with an authoritative Symbian OS dictionary in your pocket from the most distinguished language translation and reference publishers, i.e. Merriam-Webster Inc., Van Dale Lexicografie BV, Larousse Editonal, S.L., MAGENTA LTD., LingoMAXX, "Русский язык Медиа" (Russkiy Yazyk Media) etc.

Language version of "SlovoEd"

We can offer you the numerous explanatory, thesaurus and bilingual dictionaries for the following languages:

English	Estonian
French	Lithuanian
Italian	Portuguese
Spanish	Serbian
Arabic	Turkish
German	Dutch
Bulgarian	Chinese
Catalan	Japanese
Croatian	Latvian.

Some language versions of the dictionaries are available in several editions: **Compact, Classic, and Deluxe**. They differ from each other by the number of examples, synonyms, lexicographic information, transcriptions, number of translations and price.

Useful programs

	Handy Shopper is a perfect tool for keeping list of groceries you intend to buy.
	Handy Profiles automatically switches profiles according to Calendar events, location or time schedule.

Installation

Make sure that the synchronization utility (PC Suite) for smartphone connection with PC is installed on your PC. You can find this program on CD that is supplied with your smartphone.

It is necessary to install the following components:

1. SlovoEd dictionary engine;
2. One or more dictionary databases you want to use;
3. You can also install one or more sound modules.

There are two ways of SlovoEd dictionary installation: from the desktop computer and from the mobile device.

Installation from the desktop computer

To install the SlovoEd dictionary engine, dictionaries databases and sound modules, please do the following operations:

1. Establish connection between your smartphone and desktop computer, using Bluetooth, Infrared port or cable.
2. Unpack zip-package on the desktop computer. In folder Program you will find the installation files (the dictionary engine, dictionary databases and sound modules). Do the following for each installation file:
 - a. run installation file by double click;
 - b. follow the installer instructions.
3. When installation is finished the SlovoEd icon should appear in the list of smartphone's applications.

Installation from the device

To install the SlovoEd dictionary engine, dictionaries databases and sound modules, please do the following:

1. Unpack zip-package on the desktop computer. In folder Program you will find the installation files.
2. Copy the installation files to your smartphone (using Bluetooth, Infrared port or by some other method).
3. Do the following for each installation file:
 - a. run installation file by joystick or choose Options>Open in smartphone's menu;
 - b. follow the installer instructions.
4. When installation is finished the SlovoEd icon should appear in the list of smartphone's applications.

Uninstallation

You can remove dictionary database, sound module files and SlovoEd dictionary engine separately.

When you remove one of the dictionary databases you can continue using SlovoEd with other dictionary databases.

You should have installed at least one dictionary database to use program.

To completely uninstall the program from the smartphone you need to remove all components: SlovoEd dictionary engine, all dictionary databases and sound modules.

The dictionary engine is necessary for SlovoEd usage. Do not delete it needlessly.

Please, refer to smartphone's user manual for exact Uninstallation procedure.

Demo-version limitations and registration

The more you use an unregistered dictionary, the more you get the registration reminder message instead of translation. In case of sound module you will hear beeping instead of correct pronunciation. You have enter the registration code to get rid of these limitations. You will get this code by e-mail after purchasing.

Each dictionary database and sound module should be registered by its own registration code.

Please be accurate when you type the registration code: do not mix up zero with letter O, you should not enter any unnecessary spaces in the input field.

Useful information

How to purchase the program

Visit our web site <http://www.epocware.com/> and choose the product you want to purchase and press "Buy" button. There you will see the link to e-commerce system where you can complete you order.

You will get your password to E-Care system by e-mail after purchasing. Along with it you will get the registration code and program download link.

Attention! The program download link is valid within two days since you have received the letter.
